Andrew holds the reigns of the emerging field of telehealth in his hands. As a Telehealth Technician at Norton Sound Health Corporation, Andrew provides computer and network support. His efforts help expand telehealth technologies to all 15 villages in the Norton Sound region.

Andrew’s job is a perfect fit. However, when he came to NACTEC as a senior he only knew that he was interested in technology and mechanics. Through a Career Exploration session, Andrew was able to explore different educational paths and meet people that could provide guidance.

While on a NACTEC-sponsored trip to AVTEC, Andrew discovered the perfect program to meet his interests in computer technology. The rest is history. Follow in Andrew’s footsteps and let NACTEC help you find your perfect fit.
