Enrolling in Construction Technology at AVTEC was no accident for Edgar Ningeulook. He followed in the footsteps of a brother who had enrolled in the same program. Edgar enrolled in NACTEC’s first ever week-long AVTEC Transitions program in April 2016 with 14 other BSSD and NPS students. From this cohort Edgar joined two other regional students enrolling in AVTEC in August 2016. A “Day in the life of an AVTEC student” program helped Edgar take the steps necessary to be accepted into the Construction Technology program. Edgar plans on continuing to learn construction techniques and challenge himself. Following training Edgar intends to put his skills to use on Alaskan construction projects.
